

REQUIREMENT ANALYSIS – PHASE 2

MODULE 1: CUSTOMER JOURNEY MAP

Date :	27.09.2026
Team ID :	SWTID-2026-9496
Project Name :	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Customer Journey Map

A Customer Journey Map is used to understand the different stages a user goes through while requesting and processing a Standard Laptop. It helps identify the user's actions, experience, pain points, and expected improvements throughout the laptop procurement process.

Customer Journey Map – Standard Laptop Procurement Automation

Journey Stage	1. Entice (Requirement Identification)	2. Enter (Request Submission)	3. Engage (Approval & Processing)	4. Exit (Task Creation & Assignment)	5. Extend (Laptop Processing & Verification)
Objective	Identify the need for a Standard Laptop and initiate the procurement process.	Submit the Standard Laptop request with the required information.	Obtain approval for the Standard Laptop request and prepare it for further processing.	Create and assign the required Catalog Task for the approved request.	Process the laptop configuration task and verify that the request is handled correctly.
User Actions & Steps	- Identify the laptop requirement; - Decide to request a Standard Laptop; - Access the Service Catalog.	- Select the Standard Laptop Catalog Item; - Enter the required request details; - Submit the request.	- Review the submitted request; - Process the required approval; - Wait for the request to be approved.	- Process the approved request; - Create the required Catalog Task; - Assign the task to the Hardware team.	- Hardware team receives the task; - Process the laptop configuration; - Verify task details and assignment; - Complete the request process.
Touchpoints & Tools	- ServiceNow Service Catalog; - Standard Laptop Catalog Item.	- ServiceNow Service Catalog; - Standard Laptop Catalog Item; - Requested Item.	- Requested item; - Approval process; - ServiceNow platform.	- Flow Designer; - Catalog Task; - Hardware Assignment Group.	- Catalog Task; - Hardware team; - Requested Item.
Positive Experiences	Standardized laptop request option is available.	Structured request submission through the Service Catalog.	Clear approval stage before further processing.	Automation can create and assign the task consistently.	Timely task assignment helps the Hardware team begin processing promptly.
Pain Points / Negative Aspects	User may need manual coordination to initiate the request.	Incorrect or incomplete request information may require additional clarification.	Processing may be delayed while waiting for approval.	Manual task creation and assignment can cause delays and additional effort.	Delayed or incorrect assignment can affect the processing time.
